LALJI FOUNDATION
Committed to Community Development,

Community development – shallow well project report (015)

Kimamba "A" Village – Ward - Kimamba "A" – District – Kilosa – Kitongoji Scutali

Venue: Kimamba 'A' – Morogoro

Date : 4th October 2026

1. EXECUTIVE SUMMARY

Lalji Foundation is committed to promoting social welfare and sustainable community development throughout Tanzania. Through its various initiatives, the Foundation strives to improve living standards, address the needs of vulnerable populations, and create opportunities for individuals and communities to achieve long-term social and economic progress.The Foundation's work focuses on five major areas: education, health, water and sanitation, economic empowerment, and support for orphans and vulnerable groups.

Kimamba A Village, A is located in Kilosa District, Morogoro Region, Tanzania. It is an established administrative area with a history closely associated with agriculture, rural settlement, and the growth of commercial farming in the wider Kimamba area. Historical accounts indicate that the development of the area was influenced by sisal plantations, which attracted workers from different parts of Tanzania and contributed to the growth of the local population.

Agriculture has remained an important livelihood activity for the community. Residents in the wider Kimamba area cultivate crops such as maize and rice, while other agricultural activities have included sisal production and vegetable farming. These activities contribute to household incomes, food supplies, and the local economy.

In response to the need for community development, Lalji Foundation is undertaking a new shallow well project in Kimamba A Village. The initiative aims to improve access to water and contribute to better living conditions for residents. Through this project, the Foundation seeks to support community welfare and promote sustainable development.

The Shallow well NO. 015 has been kindly donated by Mr. Aliasgher Najafi in the loving memory of his deceased grand parents.

Mr. Elbati John, Village Chairman of Kimamba A expressed his sincere appreciation to Lalji Foundation for supporting the shallow well project in the village. He stated that access to clean and safe water is essential for the well-being of the community and that the project would help address water access challenges faced by residents. He noted that the initiative would contribute to improved hygiene, sanitation, and living conditions, while reducing the burden of searching for water.

Mr. Imtiaz Lalji, Chairman of Lalji Foundation, said that access to clean and safe water is a fundamental necessity for every community and an important step towards improving people's quality of life. He emphasized that the shallow well project in Kimamba A Village, Kilosa District, reflects the Foundation's commitment to supporting communities and addressing their essential needs.

He further stated that the Foundation believes sustainable development begins with initiatives that bring meaningful and lasting benefits to people's daily lives. He encouraged community members to take ownership of the project, protect the water source, and ensure proper maintenance so that it can continue serving the community for many years. He concluded by reaffirming Lalji Foundation's commitment to supporting initiatives that promote community welfare and sustainable development across Tanzania.

Mr. Aliasgher Najafi, the donor of the shallow well project in Kimamba A Village, said that his contribution was motivated by the importance of improving access to clean and safe water for communities. He noted that water is essential for daily life, public health, and sustainable development, and that supporting water projects can make a meaningful difference in people's living conditions.

He expressed his hope that the shallow well would help meet the community's water needs, reduce the difficulties associated with water collection, and promote better hygiene and sanitation among residents. He further emphasized that community development requires collective efforts and encouraged residents to protect the facility and use it responsibly.

2. PROJECT OBJECTIVES

- To provide a more accessible source of water for residents' daily household needs.
- To support better personal hygiene, household cleanliness, and sanitation through improved water access.
- To minimize the time and effort spent by community members, particularly women and children, searching for water.
- To contribute to the well-being of residents by addressing an essential community need.

- To contribute to the social and economic development of Kimamba A Village through improved water availability.
- To encourage community members to take responsibility for protecting, managing, and maintaining the shallow well for long-term use.
- To encourage proper water source protection and responsible use of the facility to maintain its safety and usefulness.

3. EVENT OVERVIEW

Parameter	Details
Location	Village – Kimamba A - Ward – Kimamba A – District – kilosa-province – scutali
Preparation Date	From 16th August to 4th October 2026
Handover Date	4th October 2026
Target Group:	Community – rural areas
Organized by:	Kimba A village council

4. PARTNERS & STAKEHOLDERS

SN	Partner/stakeholders	ROLE / Contribution
1.	LALJI FOUNDATION	PROJECT
2.	KIMAMBA “A” VILLAGERS	BENEFICIARIES
3.	Mr. ALIASGHER NAJAFI	DONOR

5. OUTCOMES & IMPACT

SN	Key Indicators	Number of Beneficiaries
1.	Beneficiaries	1235
6.	Total	1235

6. BUDGET & EXPENDITURE

SN	ITEMS	BUDGETED (TZS)	EXPENDITURE
1	Shallow well	5,000,000	4,500,000
2	Transport + survey		345,000
3	Plague		118,000
4	Media + photographer		50,000
5	Food		135,000
	TOTAL		**5,148,000**

7. CHALLENGES IDENTIFIED

- Limited access to clean and safe water, some households may experience difficulties obtaining sufficient water for domestic use, including cooking, cleaning, and personal hygiene.
- Long distances to water sources, residents may need to travel considerable distances to collect water, consuming time and energy that could be used for other productive activities.
- Time burden on women and children, water collection can place additional responsibilities on women and children, potentially affecting their household activities, education, and income-generating opportunities.
- Health and sanitation concerns, inadequate access to safe water can make it difficult for households to maintain proper hygiene and sanitation, potentially increasing the risk of water-related illnesses.
- Financial constraints, Limited household resources may make it difficult for some residents to obtain water from alternative sources when nearby sources are unavailable.

- Maintenance and sustainability, without proper management, regular maintenance, and community participation, the shallow well may face operational challenges that affect its long-term usefulness.

8. IMPACT OF THE PROJECT ON THE COMMUNITY

- The project is expected to provide residents with a more accessible source of water for their daily household needs, including cooking, cleaning, and washing.
- Increased access to water can help community members maintain personal hygiene, improve household cleanliness, and support better sanitation practices
- The availability of a nearby water source is expected to reduce the time and effort spent collecting water, particularly for women and children.
- Access to water can make daily household activities easier and contribute to the overall well-being of residents.
- Reduced time spent searching for water may allow residents to dedicate more time to farming, small businesses, education, and other productive activities.
- The project is expected to benefit children, older people, and individuals who may find it difficult to travel long distances to access water.
- The project demonstrates Lalji Foundation's commitment to addressing essential community needs and promoting sustainable development in rural areas.
- The project provides an opportunity for residents to work together in protecting and maintaining the water facility to ensure that it remains useful for future generations.

9. MEDIA COVERAGE

10. CONCLUSION

The shallow well project in Kimamba A Village, Kilosa District, Morogoro Region, is an important initiative by Lalji Foundation aimed at addressing the community's water needs and promoting sustainable development. By supporting access to water, the Foundation seeks to improve household welfare, encourage proper hygiene practices, and reduce the difficulties associated with obtaining this essential resource.

Lalji Foundation to continue with more shallow well projects in the villages of Tanzania
